Same Great Company and Software Solutions, But We Have a New Location!

Peak Software Systems is thrilled to announce that, in an ongoing effort to provide its customers with the best software systems and services, we have purchased our own building and have recently moved. The new building represents many great things for Peak Software and its customers. We are committed to being your partner in technology for many years to come. Just in case you have not updated our contact info, we've listed it below. The phone number, fax number, email, and web address are still the same, so please feel free to contact us if you have any questions or need additional information.

Just as a reminder, the Customer Care fees (annual maintenance) will be increasing January 1, 2012. For detailed pricing please see the 'News & Info' section in SportsMan or visit the website www.sportsmansql.com.

Most importantly, we want to take this opportunity to thank you for your continued business and wish all of you Happy Holidays!

Peak Launches the Revolutionary Golf Module.

Our customers have been asking us for a software module to help manage their golf courses for a long time. Finally the day has come! Peak has developed a new add-on module which integrates seamlessly into SportsMan SQL to manage golf courses with ease. Some of the highlights include:

- Tee Sheets: Easy reservation and check out for in-house and online tee times.

- Golf Cart & Equipment Sales: Quickly and easily add golf cart and equipment rental fees before the sale is finalized.

- Membership Management: Provide golf memberships, or tie golf course privileges in with existing memberships for any site in the system.

- Pro Shop Management: Benefit from integrated point of sale, inventory control, cash till handling, payment processing, financial reporting, and more at your pro shops.

- Online Reservations: Allow customers to log in and make tee time or facility reservations, or to sign up for activities.

If you like SportsMan SQL, you'll love how it works at your golf course too—of course, with pricing that's consistent with our commitment to value.

Call us to schedule a demo.
