

New Feature Releases

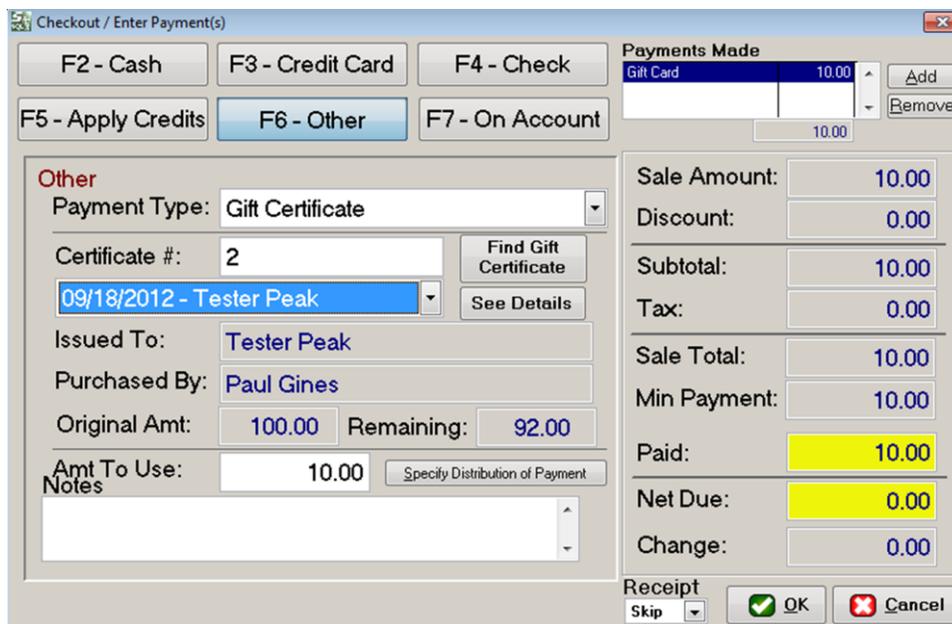

The Peak Software team has been working very hard over the last month on releasing new features and functions for SportsMan SQL. Hopefully you have updated SportsMan SQL and checked out the new features. Some of the highlights are: Online timeslot registrations, online membership sales/renewals, and emailing cash register receipts/waivers. If you have any questions about these new features you can log into our website and check out the related videos:

www.sportsmansql.com/login/ (you will need to know the SportsMan Client ID and Password). Of course, you may always contact our support department too.

Gift Cards & Certificates

We are also very excited to announce that in version 461.app, you now have the ability to sell and redeem gift cards or certificates in SportsMan SQL (the Point of Sale module is required). The development team made it possible for you to choose whether your organization would like to generate gift certificates, or utilize an actual gift card with a magnetic stripe. The gift cards can be designed with your organization's logos and branding (call for more information and pricing). No matter which option you choose, SportsMan will help you define, create, sell, redeem and manage the gift cards/certificates. The gift cards/certificates can be redeemed by your customers for any product, service, or items you currently sell. We have also added additional gift card reporting options to help you manage the amounts sold, outstanding balances, and expiring cards. To view the gift card overview video, please select the following link:

NRPA Conference

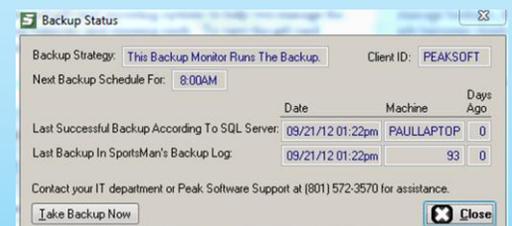

It's that time of year again when our sales team will be hitting the road and in Anaheim, CA for the big NRPA conference. We have heard from many of you that you'll also be in attendance, so be sure to stop by the SportsMan booth and say hi to Debbie and Josh. They love it when our SportsMan customers drop by the booth and visit with them.

NRPA Conference – Anaheim, CA
Booth #303, October 16th and 17th

Backup Monitor

The support department handles a lot of different calls, but the worst call that we receive is when a customer has lost their data and can't locate a backup to restore from. If SportsMan is configured correctly to manage backups, the support department's job becomes much easier when data loss scenarios arise.

SportsMan may be configured to automatically handle the backup process, but the backup monitor must be running on at least one computer within your network. You can locate the backup monitor in the Windows Start Menu>All Programs>SportsMan SQL>Backup Monitor. The backup monitor may also be configured to run as a service.

Backup Status

Backup Strategy: This Backup Monitor Runs The Backup. Client ID: PEAKSOFT

Next Backup Schedule For: 8:00AM

Date	Machine	Days Ago
09/21/12 01:22pm	PAULLAPTOP	0
09/21/12 01:22pm		93

Contact your IT department or Peak Software Support at (801) 572-3570 for assistance.

For complete backup peace of mind, we offer an offsite backup monitoring service called OnGuard for only \$379/yr. If you have any questions regarding SportsMan backups and options, please contact our support department.
